I remember that as well. it wasn't in our downloads section or in the store. but I believe [Chub@cabra](#) made a forum post to a texture he had commissioned at some point. I can't find it now and I might have the member wrong. but I recall something of that nature.

It was indeed Chup. If I remember correctly, the head and face texture were posted as images in one of the galleries. Must've been in the Cookie Jar, hence why it's impossible to find them again (what is up with the limited access to CJ, while we're at it?)
