last night I did a little bit of tweaking on the body suit texture, just matching up the back to the front a little better. and put some poser latex material settings on the outfit. I also made some face, eye, and mouth textures of my own to go with the package. tonight, I will make the MAT files for them and try to get them in the download area as a freebie either tonight or tomorrow night for everyone to get. it would be cool if we could get some conforming figure parts for the white sections and the head sections of the outfit to complete this off. I will also include Apelord's texture for the A3 harlekin hat texture as a bonus in the package as well, but since I don't own that outfit I can't make mat files for it. I was only about half way done the test render when I had to go to work this morning but it looked really great.

Just thought I would give you guys an update.
