Well, with our wicked cool Harley Quinn project underway I was wondering if there was already a screen accurate texture and bump map for the Michelle Pfeiffer version of our favorite felonious feline? A V4.2 head morf of her would be cool too.

I would prefer it to work in Daz Studio on the V4 bodysuit. I have been working on one, but I am still new to this medium, and it's a lengthy process, and I don't have a lot of time to devote to it. So if someone has one, or is up to the challenge that would rock.
