I wanted to start a thread for 3D people who are looking to find items to work on projects. THIS IS ONLY A RECOMMENDATION THREAD. NO FILE TRADING TO BE DONE HERE. /cya statement

The idea came to me while trying to find a V4 'cyber arm'. I've found all sorts of things but no cybernetic prosthetic arms. I've got a V4 character with a V3 arm and it's a pain to position and render. Does anyone know of a product out there for purchase that would fit this requirement that I have?
