I discovered the hard way that Firefox lets in Viruses. I've switched to Google Chrome and haven't had any issues. Chrome is far superior and 'won' the annual Pwn2Own contest.

I hope this helps.

OK, TN...thanks for the help.

I'm currently at local library; hope to power up and 'fix' when I get home. My current OP Sys is "Last XP", w/Service Pack 2. Microsoft won't help me..."It's an outdated Op Sys."

AssHoles!

Again, thanks for the help...if it don't work, may have to re-format computer; that will lose me a ton of hard-to-replace material, tough...but will do whatever needs to be done.
