so i've been waiting on this all week, and since its finally here, i'd thought i'd share.

<http://www.shacknews.com/onearticle.x/59887>

My intial thoughts make me very happy, and i'm looking forward to the games full release. while we all know they've been handling the story and character design properly, its a relief to my mind to know that the GAMEPLAY is being handled properly as well. i'll give it a proper review once i've had time to play some more, but it looks like this will finally get me out of my funk, as now i wanna redo all my batgirls to match the style in this game ^_^

anyway, i'm curious to hear wut others think of the game as well.

PS: for those who'd rather play Ps3/360, i've heard the demo is on their respective market places as well for free.
