I like how this is starting. Kinda an "opposite of sci-fi" from what I'm used to seeing here from you, but that's what's got my attention on this one. Looking forward as usual to the progression. And yeah, 10 years is a long time to wait before figuring out how to use them tablet skills...but who am I to talk. I still can't program my Betamax VCR, or work my 8-track.

I actually kinda like this one as is, too. Should be another good one.

Thanks again dd. Your thoughts are always appreciated.

Now

I've known how to use the tablet this whole time.

I've just not been using it comfortably. I've never gotten used to it. It seems my brain is hard wired to require I am looking at what I am doing to have fine motor control.

More interestingly is that this is just a preliminary design to something I hope will end up being a nice fantasy piece. I'm on to further prelims right now.
