So I'm on some pain meds right now... a little loopy.

I've been sleeping all day since I got my wisdom teeth out at about 8:30 this morning.

Stupid guy rolled on my vain twice, then used another. Now there's a big purple bruise.
just woke.

Had to take more medication and drink a shake.

Boyfriend has been taking care of me all afternoon.

but he went to a party that he'd been waiting for.

He'll be back later tonight. So I thought I'd take a moment.

Going back to bed now...

Thought I'd just let everyone know I'll be out of commission for about four days.

night all,

Redd
