So I just downloaded Daz 3 and made an account.

I want to start the program but I have to wait until the conformation email comes in. It has been a half hour and still no email.

If you have Daz, how long did it take for your confirmation email to come in?

I have made two accounts with two different emails, just in case one did not work.

I really need this to come in so I can work on a modeling project I have.

Please, HM I just want to get a time frame going

much love

~Redd :)
