I have just organized a set of folders of all my DAZ content, How do I get DAZ to recognize this new set of folders when it is running? What setting would I need to use?

Umm the setting of Poser

Seriously, as far as I know, you need to restart it to recognize new folders after doing the search for new content thing on start up in DS 2 and less. if you are in DS 3. my DS3a just seems to find stuff automatically.
