Mythrotica - Hetrosexual humanoid couples who shapeshift into mythological shaped beings in erotic situations, with or without muscle-traction

This is not Hentai like La Blue Girl, this is not necessarily FMG, but it does feature muscle-traction, which is the rythmic genital and muscular throbing in a mythrotica animation to elicit arousal in couples that is depicted happening to the characters while they shapeshift or after transformation.

This is not Yiff; Yiff features sexual situations with anthromorphic creatures, in mythrotica, the human like characteristics of each partner are retained in each of the mythological forms to elicit an emotional connection and to refrain the audience from believing in a bestial nature of the characters, even in werewolves, werocats, weredragons (Disney's gargoyles would be what works for weredragons in mythrotica for example, but is still copyrighted).

I do not believe in naughty tentacles in Hentai representing mythrotica, because they are not necessarily dipictions of mythological archtypes (mermaid/merman, ipotane, satyr, werewolf, werecat, succubus, centaur)

links to my artwork at the free Google groups Poser Mythical Females and Poser Mythical Females 2:

my recent posts to the HM adult art section should give you an idea of my style.

So like I asked in the topic heading, do you want this type of art to be prolific in the entertainment industry, or do you want it to be just a niche fetish?
