Been searching for days now and I simply can't find any armor for V4 that even resembles Red Sonja's chainmail bikini. I was wondering if anybody might know where I could find something like that. I used to have a perfect set of identical, if unofficial, Red Sonja armor for V3 before I had the virus wipe my system, and now I can't even remember who distributed it or what it was called. I'll continue searching, but if anyone can help in my search it'd be appreciated.
