recently...quite recently actually, I purchased and installed a copy of Poser 7 (hey, it was only \$50...win!) Problem is, I can't figure out how to install my resources much less know where to go to find new resources and models. Can anybody point me in the right direction for freebies and tell me how to install all that?

I got Poser to make some suuuuhweet a\$\$ 3D art....but its a bit pointless with only one model.
