Renderosity has a ton of freebies. Also go to daz3d.com and grab all their free characters... mike/vicki 1 thru 4 and all other freebies they have.

when unzipping free content if it has a unzip trail that's like runtime/libraries.... then just unzip it in smith micro/poser 7 and should go okay (if the content creator set up the extension right).

If it's a DAZ installer... point it to Poser7 as well.

Heromorph's store has a ton of freebies. Animotions.com has a bunch of superhero freebies too.
