My computer crashed and burned which is why I haven't posted anything new in a few weeks. I originally used Adobe Image Ready and photoshop. Now that I have a new computer I have Adobe Illustrator and CS3. I was told with CS3 I could have the capability to learn how to do poser art. Only thing is... I don't know which poser program would work for the CS3. Can anyone give me any suggestions? Any and all suggestions will be greatly appreciated. Thank you.
