So far all I've heard people describe Mickey Rourke's character as has been "the Russian Villain". does anyone know who he was actually supposed to be? When i saw the previews I initially thought he was Omega Red and then was told that he was Whiplash which i find hard to believe especially since Whiplash was a hired killer and not Russian. I think he was Crimson Dynamo simply because he had the same name and his final version of armor looked slightly like CD's...now why he had the electric whips...i'll never know

.

He was a mashup of Whiplash and The Dynamo. I don't know why but he was.
