Wow, haven't seen this thread in awhile. Seems weird after taking classes. But now that I think of it, I do have some odd thoughts.

The class I took had us using Newsprint and some other heavy weight paper. The teacher was fond of Bienfang.

Don't remember if a view finder was mentioned here. We had to make one from card board. Just cut 2 "L"s out of a square and you're good.

Also, I was at a store called MicroElectronics. They had a Wacom Intuos 4, for 248.00
