As for the particular item, texture etc are you wanting to do away with lets say V3 and everything or just stuff that would belong to just her like clothing and textures that go with it?

Daz or maybe Renderosity? has a freebie download that tracks Poser Run times and what they are associated with. that may help you?

Yeah, I am wanting to get rid of everything that is strictly V3, M3, SP3, well, anything 3. And I want to get rid of everything. I think my runtime being so big is the reason for some of the issues I have when ever I run poser. I am a collector... and it has come back to bite me on the a\$\$.

I haven't found anything that will list file associations yet.
