Hi, I've been searching for a Daz/Poser Batarang and cannot locate any. Can anyone direct me to a place which has one for download, or alternatively, any suggestions for using other available props to create one. I am also on the lookout for a Captain America's shield prop...which probably illustrates just how much of an inept noob I truly am, not being able to figure out how to make a round object, but...

Thanks for any and all replies.
