April's Pinup Portfolio now available on [IndyPlanet!](#)

You've seen the vibrant, funny, and physically luscious April Fewells in her comics, now she has her own pinup book! This collection ranges from her earliest pinups to some of her newest, most you've seen here at HM. 24 pages in all with over a dozen pinups in full color and a brief description of each on the overlay. For April fans, this is a much better value than buying them individually as prints. Heck, a single print of comparable size from deviantArt for example, will run you nearly \$5.

PG fanboy (and fan girl) fare, with a foreword by our very own **MissVee!**
