Actually, comics never really translate to live action TV in a satisfactory way (at least for me). Smallville (the best adaptation yet) became much more in line with the comics over several seasons but how long did it take them to get on track??!! I wouldn't expect DC to accurately depict a major player right off, particularly since I suspect many of the writers are not long term comic fans so I rather like the idea of them taking a lesser figure with great potential and building on it. I would like to think it bears greater potential for success but I suspect I'll end up eating those words when it turns out to be a Sabrina the Teenage Witch retread!
