As the subject says, I was wondering if anyone out there knows where the Muskateer Graphics site has gone to?

For those not in the know, that was a site that hosted many free 'skins' for Poser models (particularly Vicky/Mike 3), most of them of a Superhero content.

I once had all of them, but seemed to have lost them in a drive crash.

All of the links to his site seem to be dead now (www.muskateergraphics.com/home.htm).

If anyone knows of any new site that has been set up, or anywhere else I can obtain the skins it once hosted, I would be very appreciative
