I'm not sure if this is the right place to ask this, but here goes anyway.

As the subject says, I'm looking for the "Mystique" texture for Victoria 4 as found in this link at my blog:

I recently had to do a re-install of my OS, and like an idiot I forgot to move the folder I kept outside of my runtime with a lot of the textures I used (I had even managed to find those from Musketeer Graphics, and now they are gone for good as well).

I've searched here as well as at Animotions (which doesn't seem to offer any Poser freebies anymore), and I found an older, much less detailed one in my files. ShareCG is difficult to search, since to avoid copyright infringement many people don't outright name their files after the characters they are based on (and "Mystique" didn't turn up anything)

Any help would be appreciated
