What about Puck? I guess he isn't part of the team anymore. I actually used him as a reference for Steve. I read Alpha Flight when it was first released(Early 80s). As a matter of fact, Northstar was the first openly gay superhero. I don't know if it was the first in comics... but he was the first at Marvel. Back in the day, it was a very good comic. Not to mention I LOVE John Byrne's artwork.

Oh, and I don't know how they brought Gaurdian back from the dead... but I liked him better that way. That was a shock when they killed him off in #11 or #12. Short life for him!

But, I do not have any ideas for casting.
