I have to agree with that sentiment of "Rise of Planet of the Apes". This was by far LOADS better than the first redux of the films and it goes into a good amount of explanation of how it happens... which I can completely see this happening in either the rise of apes or even zombies... of course, I just love the originals and their cheesiness...

Transformers 3: no Megan Fox... ya know, this was one step in making the franchise better. There was a lot more action in this one too. An introduction to a few more Transformers would've been nice (and thanks for not making Soundwave a boombox)
