Hub... I can make you a great deal on the first 30 or so... I quit collecting it when Claremont left.
They can be all yours for \$1 million Dollars

But I liked Excaluber... I don't know why I did, because the only thing I really remember is Lockheed.
I am pretty sure it was the artwork. I collected comics for the art, not the story. Although, good art
and a good story... whoa... that was some good sh!t.
