I know there is a "style" to Anime... but the word "Anime" just means "Animation" in Japan. So, technically, Loony Toons is Anime.

I have to agree with Hub on this one... man, I couldn't wait for Battle of the Planets.

Funny thing, about a week ago I found all my old Shogun Warrior toys: Great Mazinga, Raider, Dragoon and Poseidon.

I don't remember watching a cartoon. Was there one?

Oh, I also found my old Micronaut Baron Karza white and black version in the same box. It was an exciting find!

OH, and since I don't like the new style stuff, I would prefer that they don't butcher any of my favorite titles and turn them into an anime series.
