Dang! Looks like everybody loved it! Me too! Although my expectations were considerably lower than most, I was most pleasantly surprised. The script was sharp, the characters true to their comic book personalities. Great interaction of characters, plenty of humor, drama and action. It's got pacing like a freight train, epic scale and if I were trying to describe the FX to someone, they'd never believe the seamless realism achieved. May have to see it again myself.

My choices for Avengers I want to see added next time: Quicksilver, Scarlet Witch, Android Vision.

Those would be cool choices to add they'd have to do a witch/vision movie beforehand surely so much backstory and all with those two ;)
