How some of my art is done -

<http://s516.photobucket.com/albums/u322/graffik/RandomArt/?action=view¤t=IronMan-template2.jpg>

(note this is an earlier template)

I use solid area templates such as I did on this iron man template I used the gold-green re-colored section after the #1 on the image Moving the sections of it till it felt right, and applied shadowing / hightones sometimes leaving as-is

Under "2 earlier choices" was earlier samples i abandoned diff metals

"1 used" is the one used based upon the gold re-colored pot

The Pot was used in all of iron mans yellow areas

(final image is in my galleries)

Red was a different base metal

I do not know anyone else who ever makes them like this - I used to make similar photomanipulations like 10 years ago bt in MS Paint
