I don't have much to add of what everybody has already said, just that this is the superman we all wanted to see in the films, the flashback origin is great because we don't get an hour of boring origin we already know.

The whole movie is great I went to see the movie in 4DX and it was awesome!!.

I think that this superman is going to be really hated sometimes after a fight with an enemy, they destroyed most of Metropolis!!!

They have raised the bar to high for the next movie, if they choose to introduce Lex Luthor in the in the next one they need a pretty good story so we can enjoy the same kind of super action!!

And I'm with you Star, Laurence Fishburn....a black Perry White?...I'm all for changes but in this one I don't see the point (example: in Daredevil I accepted Michael Clarke Duncan as kingpin because he has the body for the role)

spoiler alert!!

The Easter Eggs that I saw were the Lex Luthor gasoline truck and the Wayne tech satellite, did I missed any other?
