What can I say? I've always been a "Super Hero" fan... T started to get involved in this world trading comics with a friend, I would trade a comic and draw the cover. Then I received a Poser 3 in a magazine, which led me to Animotions, and eventually I ended up here through the download center, looking for freebies to use in Poser. So basically there it is, I became a Heromorpher. Down this road I've met lot of Heromorphers that in a way or another have helped me grow in my artistic skills... To name a few, in the order I've come to meet them.

Yunners his awesome 2nd skins the took me into the in depths of Poser Materials, like making a transparencies on top of a skin texture yet using the skin texture as part of the image...

Spydraxis\* Basically known him since I 1st arrived here and still a teacher to me.

Pijon\* Always has been one of the commentators/critics that have help me grow.

Dark Wanderer\* Been a mentor since the Zombie Team Up

Daswook, responsible for my latest interest in manipulating.

B\* Responsible for me evolving into manipulating full clothing...

MsV her manips are always fun to look at and has shown appreciation and used my contribution in HFC to create Manipulations...

and who can forget...

Lordcoyote, and his wolf like people series that where like top images for weeks even after the comments were change it can't you make something different if there having sex then... well what ever...

Happy Anniversary Heromorph...
