Item's not finished - some smoothing and re-shaping is done later like the eye is in wrong direction, it's a tongue it was supposed to be salivating like spawn, it will be reshaped a bit too. I do these in stages - certain parts are done in in finals - the webs are photomontage on suit instead of freehand drawing all that in PS

yer right does look a bit like balls - that'll change :)

The Blue was added here -> <http://www.freeimagehosting.net/koyp7>

tongue is slimmer Eye fixed a bit - still as I said a work in progress - be nice to get opinions before it's finished

Blue was from a black leather image colored blue and liberal shading / hightones added the red webbing done from a mesh image
