downloaded the new Daz Studio. Man do I have I lot to learn.

No offense buddy. But Daz4 can be somewhat overwhelming to a first timer [hell it has me scratching my head every time I use it]. They do include some nice tutorials that should help you along the way, but I would suggest that you work with an older version [no lower than Daz 3] first to get yourself better acclimated to working in 3D. Then when you feel comfortable then make the upgrade. But then you know my number , you could always call.
