Daredevil kicked butt! I give it four thumbs up! Vincent Donofrio is to Kingpin what Patrick Stewart is to Professor Xavier, You just can't find an actor more fit to the part. Everyone was well cast and I thought Vanessa was a dead ringer to the Mrs. Fisk of the comics! I hope they introduce some of his supervillains in season two like Mr. Hyde, The Owl, Elektra, Stilt-Man and let us not forget Bullseye! Bullseye! Bullseye!

Hyde is already on Agents of S.H.I.E.L.D., so the only way he's showing up on Daredevil is if they do a crossover episode or get the actor to show up on the other show. Since Marvel's stuff is all connected, it's totally possible. I believe that Elektra was hinted at already as there was a scene with Matt and Foggy talking about a mysterious Greek girl. It was a good show, and I too look forward to seeing more foes in the next season.
