For all of you artist that still know how to manip, here is an interesting little video from Warner Bros. Production Designer Paul Lasaine. He basically shows off how bad ass he is, since this isn't really a tutorial. BUT, if you have a grasp on Photoshop, you will know exactly what he is doing. If you do not, PM me and I will attempt to fill you in.

Pretty cool. It isn't how I do fur, but I am going to give it a shot.
