117 veiws and none of you jack-sticks have an answer? At Least DW offered up some ideas. LOL I figured it out... don't worry, and (here comes the sarcasm) Thanks for your freakin' help.

And DW... the solution actually had nothing to do with assigning cameras like I thought. It was simple and I am glad I accidentally clicked on the button. And NOOO... I am not sharing, you non-speaking Poser a-holes will have to figure it out on your own.
