I only ever tried to do some rigging in different programs. but I fond these links that may help

http://docs.daz3d.com/doku.php/public/software/dazstudio/4/userguide/creating_content/rigging/tutorials/basic_rigging_preparation/start

http://docs.daz3d.com/doku.php/public/software/dazstudio/4/userguide/creating_content/rigging/tutorials/adding_bones_for_rigging/start

You could also try to transfer someone else's rigging into the model using the transfer tool.

https://www.youtube.com/watch?v=yUFvv4Nmtvw

Please bear in mind, it has been about 6 years or so since I have even opened a 3d program, so I am not much help.
