As some of you may have noticed, we got another "bandwidth limit exceeded" message on the site at the end of January.

Please, PLEASE, **PLEASE** optimize your photos for the web! Case in point, Feb 1st a DC 1Mil pic was posted that weighs in at almost 2mb! Saved in photoshop, optimized for the web, it was less than half that.

If bandwidth becomes an issue again, we may be forced to either limit file sizes or turn on the queue. DON'T MAKE US TURN ON THE QUEUE!!! *points threateningly*
