In an effort to save bandwidth we have changed the requirements for posting in the regular gallery. File sizes now must be 600k or less and the picture dimensions can be 1500 x 1500 max. 600 k is more then enough space for any picture is properly optimized. Please no matter what your picture size is, please optimize your pictures for the web. This change only affects the public gallery, as most of the bandwidth is lost there, the other sections have not been changed.

Thank you
