Here was my Idea I was working but will never make it to print due to the crash....

Knight Rida:

See I was never a fan of a Radio Controled car with a limited AI. Knight Industry Two Thousand or K.I.T.T

My updated version K.I.T.T. stands for Kombat Intereactive Tactical Technology when in KITT is a pimped out SCION that would morph into a battle mech/transformer looking thing that Michael Knight could pilot or it would use it's A.I to actually bail Knight out of trouble by wreaking a wall or 2 with its missile rack and or gattling gun arm :) think of ED-209 (from robo cop) On Crack and you get a general Idea :)
