I am currently trying to make a background that will help. some of the manips look better with a white background and some look better with something else. so i will see what i can do for you once i get you picture in. i am currently working on a kind of fancy swirl background that move to cover the parts that look better with a color and doesn't come in to contact with the parts that look better with a white one. Once i get get your peice i will see what i can do for you. i might just go with horizontal bars of grey and white. (///// like that) but i will have to see once i get you picture. due to my job i most likely wont have time to work on it until thursday or friday so the picture wont be done till the weekend. if everything goes as planned.
