what's funny is they keep calling that Ophichuckitswhatever a new sign. I find that funny since I first heard about that sign on a show about Ancient Rome. But yeah, basically the constellation for that "new" sign was in the sky like what? 2000 years ago?

And then there's shit sayin that it doesn't affect me. It only affects those born in 2011. Doesn't matter to me. I like who I am. To hell with the rest o' ya. :D
